

[ADEKUNLE AKOREDE EMMANUEL]

Data Analyst | Mathematics Graduate | Aspiring Data Scientist

[08065495063] | [adekunleemmanuel995@gmail.com] | [akoredeadekunle.github.io] | [akoredeadekunle.github.io/index.html] | Lagos, Nigeria

PROFESSIONAL SUMMARY

Mathematics graduate with a strong foundation in statistical reasoning, quantitative analysis, and problem-solving, transitioning into Data Analytics and Data Science. Proficient in Python, SQL, Excel, and Power BI, with hands-on experience in data cleaning, data scraping, exploratory data analysis, and dashboard development. Practical exposure to database management and web-based data systems gained through an internship in a government technology department. Skilled at transforming raw, unstructured data into clear, actionable insights, and committed to continuously developing technical expertise in analytics and data science.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, Data Cleaning, Data Preprocessing, Data Scraping / Web Scraping

Analysis & Visualization: Microsoft Excel, Power BI, Data Visualization, Exploratory Data Analysis (EDA), Dashboard Development, Data Reporting

Other Competencies: Database Management, Data Collection, Statistical Analysis, Business Intelligence

PROFESSIONAL EXPERIENCE

SIWES Intern – Database Department (Application Unit)

Lagos State, Nigeria

Lagos State Ministry of Innovation, Science and Technology (MIST), Alausa, Ikeja, Lagos

- Supported data analysis tasks within the Application Unit, working with departmental data to inform routine reporting and record-keeping.
- Assisted with data engineering and backend database implementation activities, contributing to the setup and organization of departmental databases.
- Carried out data collection and processing tasks, including gathering data through web scraping for departmental use.
- Contributed to website development projects, covering both web design and development aspects of departmental digital platforms.
- Participated in networking-related tasks as part of the unit's broader IT support functions.
- Collaborated with the Database Department team on database-related tasks, gaining practical exposure to real-world data and systems administration workflows.

PROJECTS

Power BI Sales/Business Performance Dashboard — [Global Superstore Sales Performance Dashboard]

- Objective: [Describe the business problem or question the dashboard was designed to answer].
- Tools: Power BI, Excel.
- What I did: Designed and developed an interactive Power BI dashboard to visualize [dataset/topic], connecting and transforming data from [data source].
- Techniques: Data modelling, DAX calculations, interactive filtering, and visual storytelling to support data-driven decision-making.

- Key outcome/insight: [Key Insight / Result].

Python Data Analysis Project — [Project Name]

- Objective: [Describe the business or research problem addressed].
- Tools: Python, Pandas, NumPy.
- What I did: Analyzed [Dataset] using Python to identify patterns and relationships within the data, applying data cleaning and preprocessing before analysis.
- Techniques: Exploratory Data Analysis (EDA), statistical analysis, and data visualization to interpret trends.
- Key outcome/insight: [Key Insight / Result].

SQL Database Analysis Project — [Project Name]

- Objective: [Describe the analytical question the SQL queries were designed to answer].
- Tools: SQL, [Database system, e.g., MySQL/PostgreSQL].
- What I did: Queried and analyzed structured data from [Dataset/Database] to extract insights relevant to [business question].
- Techniques: Data extraction, joins, aggregation, and query optimization for efficient data retrieval.
- Key outcome/insight: [Key Insight / Result].

Excel Data Analysis Project — [Project Name]

- Objective: [Describe the problem or dataset analyzed].
- Tools: Microsoft Excel.
- What I did: Analyzed [Dataset] using Excel to organize, clean, and summarize data for reporting purposes.
- Techniques: Pivot tables, formulas, and data visualization to present findings clearly.
- Key outcome/insight: [Key Insight / Result].

Data Cleaning & Preprocessing Project — [Project Name]

- Objective: [Describe the raw data quality issue being addressed].
- Tools: Python, Pandas.
- What I did: Cleaned and preprocessed a raw dataset ([Dataset]) by handling missing values, duplicates, and inconsistent formatting to prepare it for analysis.
- Techniques: Data validation, transformation, and standardization.
- Key outcome/insight: [Key Insight / Result].

Web Scraping & Data Collection Project — [Project Name]

- Objective: [Describe what data was needed and why].
- Tools: Python, [Scraping library, e.g., BeautifulSoup/Scrapy].
- What I did: Extracted data from [Website/Source] through web scraping, structuring the collected data for further analysis.
- Techniques: Web scraping, data extraction, and data structuring for downstream processing.
- Key outcome/insight: [Key Insight / Result].

EDUCATION

Bachelor of Science (B.Sc.) in Mathematics

Class of 2026

Federal University of Agriculture, Abeokuta (FUNAAB), Ogun State, Nigeria

- Developed a strong foundation in analytical thinking, statistical reasoning, mathematical modelling, and quantitative problem-solving, directly applicable to data analysis and data science.

ADDITIONAL INFORMATION

-
- Languages: [English — Fluent]
 - Interests/Continuous Learning: [e.g., currently studying Power Bi, if applicable]
